Profile

Through my four years of high school and two years of college I have been sharpening my Adobe software skills, familiarity with core design principles and other techniques that are essential in the graphic design industry. I'm a person who loves a challenge, I thrive on tight deadlines. I work best independently, however I'm always open to working with a team to develop ideas and go through the design process to arrive at the best possible solution. My own worst critic is myself, and any work I deliver has been revised and developed to the furthest extent; I live for great design.
